

SERVING THROUGHOUT THE LOWER MAINLAND, VANCOUVER ISLAND AND BC INTERIOR

SPORTS TURF : GOLF COURSES

TOP-DRESSING SAND

By specializing in sand top-dressing of golf course fairways and municipal sports fields we are able to accommodate not only large contracts (6000+ tonnes), we also work with smaller clients and offer complete packages including the purchase, delivery and application of sand.

DEEP TINE AERATION

Farm-Tek Turf Services Inc. provides deep tine aeration on greens, fairways and municipal sports fields using the durable "Soil Reliever" from the company Southern Green.

This equipment is faster than conventional tine machines which allows for a smoother surface in less time. Our method virtually eliminates any soil puckering. We also have a vast selection of solid and core tines that will be sure to meet the exact requirements of your turf.

OVERSEEDING

Our new Redexim Double Disk Overseeder actually plants the seed firmly in the ground, providing outstanding seed to soil contact and providing unmatched germination for fairways and sports fields. Boasting a tight spacing under three inches our equipment can accurately follow all types of terrain.

MUNICIPALITIES

CONTRACTORS

VERTI-CORE AERATION

For fairways and greens 2"–3" spacing up to 5" deep.
Core collection also available.
